

GLM Lasermeßtechnik GmbH – Repair

Repair of Sokkia Lasers and Levels

LM Lasermeßtechnik itself no longer adjusts and repairs lasers (LP series) and mechanical construction levels from Sokkia.

However, we can recommend workshops that carry out this service for our regular customers:

- [Rogoll Vermessungsgeräte Service \(measurement instrument servicing\)](#)
- Goecke Bau-Service GmbH (construction service)
- [Jochen Grosse – Baulaser & Nivelliertechnik \(construction lasers and level technology\)](#)

Designations of older types/models of Sokkia lasers and levels:

- LP31A and LP30A
- LP300 and LP310
- C300, C310, C320, C330, and C340
- C410
