

GLM Lasermeßtechnik GmbH – Reference list of track construction vehicles

Reference list of track construction vehicles

GLM Lasermeßtechnik GmbH has been successfully working as a system supplier and service provider for frame measurement of track construction vehicles since 1992. Whether in heavy inspection, maintenance, restriction measurement or entrance and exit measurement after accidents; the 3D measuring system always and precisely fulfils its task. An excerpt of vehicle types for which frame measurements are already regularly carried out follows.

- Heavy auxiliary vehicles (e.g.: GAF 100)
- Track power trailer (e.g.: H 26)
- Track wagon trailer (e.g. H27)
- Locomotives (e.g.: KÖF)
- Tamping machines (e.g.: Unimat 45)
- Gravel plough (e.g.: DGS 62 N)
- Material trolley (e.g.: Recorder measuring trolley for DGS 62 N)
- Motor tower car (e.g.: MTW 100)
- Two-way excavator (e.g.: A900 ZW-WB)
- Catenary line machines (e.g.: FUM 100)
