

GLM Lasermeßtechnik GmbH – Mesa

Mesa

The Mesa has been offered as an alternative to Archer². This handheld has been equipped with special protective features to be able to resist the difficult external conditions and fulfills protection class IP 67. Thus it is resistant to all kind of thermal extremes, splash water, moisture, dust, crashes and other physical impacts.

The Mesa has a resistive display, which means it reacts to pressure. Due to the display size of 5.7 inches the display allows operation with the fingers
