

THE TABLET

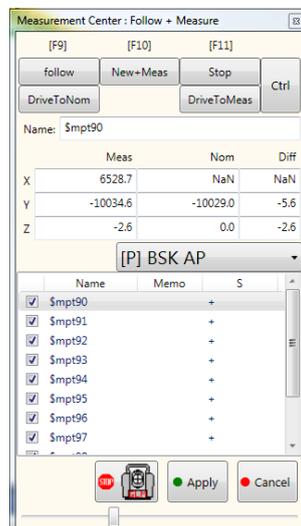

Standard tablets quickly reach their limits in the industrial sector. Thermal extremes, splash water, moisture, dust, crashes and other physical impacts demand a lot from the tablet. Therefore we recommend the use of the Dell Latitude Rugged Extreme Tablet. It has been equipped with special protective features to be able to resist the difficult external conditions and fulfills protection class IP 65.

Additionally, it has an 11.6-inch FHD display optimized for outdoor use and always ensures optimum readability.

THE MEASUREMENT

With the Measurement Center of the 3-DIM software, you can control your measuring instrument via Bluetooth directly from the tablet. The menu is based on the familiar and proven 3-DIM Observer interface.

THE ADVANTAGES

Completely new possibilities open up for you. All the points to be measured are shown on the display and can be selected conveniently via the graphic interface. In addition, you are now able to check the measurement on site - Have all data been recorded correctly before leaving the site or is it necessary to repeat some measurements? Thus you avoid costly follow-up visits on site to collect the missing information.

IN PRACTICE

We recommend using the cross belt which is included in the delivery. In doing so, you will be able to stay directly at the measuring object and at the same time you can position the target objects. Thus you achieve shorter measuring times. Should a measurement take longer, you do not need to worry about the battery life. The tablet has dual hot-swap batteries, so you can change the battery while the tablet is running.

DELL RUGGED TABLET DESK DOCK

Right after the measurement you can start the evaluation in the office. You simply place the tablet on the Dell Desk Dock. In the IP 65 certified dock, the tablet is charged directly and expands the tablet with additional connectivity features including dual display support with VGA, serial and display port outputs and USB 3.0 ports. Furthermore, the docking station has two additional battery charging slots.

SYSTAINER

With the practical Systainer and the specially made inside you have the possibility to store the tablet including the accessories safely and clearly arranged.

EXTENDED SCOPE OF DELIVERY

So that you do not run out of energy during long measurements, two additional batteries are included in the scope of delivery. In addition, a USB keyboard with integrated touchpad is included, which fits easily into smaller working environments and allows you to work comfortably. The practical cross belt is also included.

SPECIFICATIONS:

CPU:	i5 @ 2.6GHz	Operating system:	Win 10 Pro 64 Bit
RAM:	8GB	Dimensions:	Height: 24 mm Width: 312 mm Depth: 203 mm
HDD:	256GB SSD	Weight:	1,28 kg
Display:	11.6"(29.5 cm)
