

## GLM Lasermeßtechnik GmbH – Sokkia automatic levels

### Sokkia automatic levels

Sokkia offers a variety of automatic engineering levels for individual applications. All models are equipped with a precision compensator, which guarantees outstanding accuracy and reliability due to the magnetic damping system.

#### Technical data

- Magnification 24x to 40x
- Average error for 1km double levelling +/- 2.0mm to +/- 0.7mm
- Plane plate micrometer optional (only for B20)
- Internal metal pitch circle (pitch 1 gon or 1 degree)
- Magnetically damped compensator
- Two-step focusing
- Endless fine drive, on both sides
- Shortest target distance 30cm
- Setups on flat or ball head tripods
- Reading prism for circular spirit level
- Water protection according to IPX6
- Diopter for rough aiming

#### Scope of delivery

- Suitcase
- Lens cap
- Protective cover
